## Seeds in Fall...Collect Them All! Data Sheet #2

**Directions:** Record the variety of seeds found. Calculate the percent of the class that found each type of seed.

**Question:** *How much tree biodiversity is in your area?*

Name of tree	Number of students who found this tree seed	Number of students in the class	Percent of the class who found this tree seed	
			percent (* rounded)	percent bar graph (each line = 5 percent)
red maple	5	26	$5/26 = *19\%$	
		Total number of tree types listed on this sheet (count only those found by at least 5% of the students)
